

Do you live in a district that is forcing masks on students and wants to make a difference? Are you among the Americans who do not know where to start to make that difference? Do you have that fire in your soul to bring these mask mandates to an end, but feel you don't have the education to voice your opinion?

We have made it simple for you to activate your patriotism and join the Vaccine Police activists who stand up for God's Law, believe in our unalienable rights, which are granted by God the Father, and will hold individuals accountable when discerning factual science and the law.

If you fit this description, no matter your education, no matter your title- YOU have the right, as a Creation of God, as per your State Constitution and as per The United States Constitution to call your School Board and put them on notice of the possibility of committing fraud. They commit fraud if they do not communicate to the communities they serve, that although they highly recommend/mandate mask use, everyone equally has a right of a religious and/or medical exemption.

******Please note******

If the district has respectfully acknowledged these rights, that you have a religious and/or medical exemption, visit your local municipal building or courthouse office to obtain an affidavit of religious belief. A medical exemption would need a physician's signature. Most of the time, the affidavit of religious belief will need to be notarized. This must be honored.

The Vaccine Police has put together 7 easy key points any concerned American should bring to the attention of their School Board. If they do not rectify their mask mandate, which would include making changes to the narrative of mask mandates to include the rights of religious and medical exemptions, the Vaccine Police will subpoena each individual who chooses to ignore the laws provided to the American people.

Key Point 1. Please call your Superintendents, Principals, and school offices. It would be of great benefit to call the superintendent directly.

Key Point 2. Inform them of the possibility that fraud has been committed. Again- it is unlawful to require the use of masks, and not in the same sentence, inform the public of their right of a religious and a medical exemption.

Key Point 3. Remind them, that the right to a medical or religious exemption is a federal law and no state law or company policy can override a federal law or The Constitution. Civilians of all ages have a medical and religious RIGHT for this exemption. Failure to make necessary changes to this narrative is a federal offense and you will be held individually liable for committing fraud. (Jail time can be imposed upon this offense).

Key Point 4. Adversely, if you impose mask mandates and do not inform parents and/or students of their right to medical and/or religious exemption, you are opening yourself up to a civil lawsuit. What this means, is that you, as a citizen of the United States, will be held personally liable in a civil lawsuit.

Key Point 5. This direct communication is key. It is imperative, that it is known to the person you are speaking to; that this communication is now a public record. The school district in which you've filed your concern has officially been put on notice of the changes necessary to avoid a lawsuit. Mask mandates are unlawful, and each individual has a right to medical and/or religious exemption by law and must honor it. Individuals can no longer hide behind corporations, as we are holding individuals accountable.

Key Point 6. Ask that these changes be made within a timely manner, within 5 business days. The school websites should reflect this information, any door with a mask covering sign should also be accompanied by a religious and medical exemption sign next to it. The school can place this information at Staff and PTO meetings, throughout the halls, and on social media.

Key Point 7. We are calling to inform these schools out of love. We do not want to form a lawsuit against them, and more importantly, we do not want to see fraudulent charges be placed upon them. Fraud is very serious and not telling the public that they have a right to these exemptions is fraud and this will not be tolerated. Ask the school to advise when changes will be made, so we do not have a lawsuit drawn up and served.

Last- Inform them of a few reference cases. Please reference Christopher Key (Vaccine Police) and the Jefferson County Schools case, which was held in Birmingham, Alabama. This case included individuals that serve on the Board of Education, the Superintendent, President, Vice President. Also, reference Christopher Key and the Southeastern Conference Office case.

These cases were successful cases against fraud, masks, and vaccine mandates. In other words, Christopher Key WON these cases.

Make note of all that have been contacted. Email Christopher Key @ christopherkey111@yahoo.com to make sure action is taken on those who do not comply with the law.

Anyone can make a phone call. Anyone can make a difference. We are God's people, and no man stands against us.
